

# Rental Works Contractor Services

Contractor Services that can provide prices and availability of a wide variety of larger construction related equipment.

It is our goal to provide contractors, industrial users, and government agencies a basic one stop shop.

We believe that the professional contractor has better things to do than to be making multiple calls to find the equipment that meets their need and fits within their budget.

We understand that shopping by phone can have its pitfalls. With our vast network, our Contractor Services Team believes in finding you the best value in available equipment. That means providing you not only a good price but securing late model equipment that is in great working condition.

Let us kick the tires for you!

One thing we know is that when you have equipment on the job site, it must perform as needed.
